Giulio Steffano Libralato Oliva
UX/UI Designer - BA in Communication and Advertising

Lima, Perú | +51 983203160 | giuliolibralatooliva@gmail.com | LinkedIn | Portfolio

Professional Profile

UX/UI & Product Designer with 5 years of experience designing end-to-end experiences for web and mobile products, from early discovery to polished UI, for clients in the U.S. and Latin America across healthcare, real estate, telecommunications, insurance, ed-tech, and SaaS. Skilled in user-centered design, interaction design, user flows, wireframes, and interactive prototypes that clearly communicate behavior and intent, as well as contributing to and evolving Design Systems in Figma. Incorporate AI tools throughout the design process (Claude, Claude Code, Claude Design, Figma Make, Gemini, and Mobbin MCP) for research synthesis, ideation, rapid prototyping, and iteration, including AI-assisted and no-code prototypes. Use user research, A/B testing, and data to inform design decisions, and present the "why" behind design choices directly to clients and stakeholders. Experienced across B2B and consumer products on iOS, Android, and responsive web, collaborating closely with product, engineering, and stakeholders to turn requirements into simple, effective solutions. Background in advertising and branding. Open to international relocation with a 3-week notice period.

Work Experience

Designli.co
UX/UI Designer Semi-Senior ***September 2025 – Present***

- Design end-to-end experiences for 16+ web and mobile products (iOS, Android, and responsive web) across 6+ industries, including real estate, healthcare, property remodeling, casino gaming, grief support, and SaaS dashboards, spanning B2B and consumer products.
- Lead design in Solution Labs, turning business ideas into user flows, wireframes, and interactive prototypes that clearly communicate behavior and intent for development-ready MVPs.
- Conduct discovery workshops with clients and stakeholders, combined with industry and competitive research, to identify user needs and pain points and translate insights into data-informed design decisions.
- Deliver AI-prototyped UI/UX concepts in 5-day Impact Weeks, identifying pain points and flow bottlenecks on existing platforms to shape 90-day roadmaps.
- Design growth-focused and user acquisition solutions in Traction Labs, and continuously iterate on active projects in Delivery.
- Incorporate AI tools throughout the design process (Claude Code, Claude Design, Figma Agent, Antigravity, Mobbin MCP), from research synthesis and ideation to rapid prototyping and iteration, accelerating idea validation with clients.
- Design structured prompts and conversational AI workflows to support research synthesis, ideation, and rapid prototyping, improving consistency and speed across design deliverables.
- Contribute to and evolve the Design System, applying Human Interface Guidelines and Material Design to ensure visual consistency and efficient engineering handoff.
- Present design proposals directly to clients, explaining the "why" behind design decisions, defining scope, and recommending solutions.
- Collaborate with Product Owners, Solutions Architects, Tech Leads, Software Engineers, QA, and Growth Engineers in Agile Scrum, maintaining bilingual (English/Spanish) communication with international stakeholders.

High Peaks Resort
Houseman ***December 2024 – March 2025***

- Performed cleaning and maintenance tasks in common areas, meeting the hotel’s operational standards.
- Coordinated the efficient delivery of orders and guest requests, prioritizing quality in care.
- Communicated fluently in English with international teams and visitors, strengthening language skills in a professional context.
- Worked with multicultural teams, fostering a positive and service-oriented work environment.
- Demonstrated commitment, punctuality and responsibility, gaining recognition for consistent performance.

Konecta Digital Marketing Agency
UI Designer ***October 2022 – December 2024***

- Profile focused on customers in the telecommunications, insurance and other sectors.
- Designed and managed the visual identity of multiple brands, ensuring consistency and high impact in digital environments.

- Developed responsive web interfaces and landing pages on Figma and Sketch, applying user-centered design principles.
- Created visual pieces for social media, performance campaigns (Google Ads, Meta Ads) and brand launches.
- Designed logos, visual systems and graphic lines for new brands or specific campaigns.
- Collaborated with marketing, development and account teams on validation processes, feedback and quality control.
- Managed constant communication with international teams to ensure effective delivery of deliverables.

minegocioendigital.pe
Digital Consultant ***March 2022 – May 2022***

- Led a team of 3 people in the execution of weekly campaigns and deliverables.
- Managed a portfolio of 30–40 clients, providing tailored digital strategy consulting (branding, performance, web presence).
- Planned and executed campaigns on Google Ads and Meta Ads, optimizing performance per client.
- Designed websites in Figma, focused on usability and conversion.
- Created content and designed monthly social media calendars, customized for each industry.

minegocioendigital.pe
Product Developer ***February 2021 – July 2021***

- Developed websites on WordPress from initial design to final launch.
- Designed layouts in Figma and built responsive, visually clean websites.
- Handled technical management: hosting, domains, DNS, corporate email setup, and customized client configurations.
- Wrote and designed visual content for social media, including monthly calendars and brand logos.

Personal Projects
Freelancer ***2021***

- Managed projects for the educational platform (ed-tech): Lessin.
- Designed complete platforms like SaaS, user and client platform.
- Designed applications as personal projects for iOS operating system.

Skills / Tools

- Figma
- Figma Make & Figma Agent
- Claude, Claude Code & Claude Design
- Gemini & Antigravity
- Mobbin MCP
- Sketch
- Adobe Illustrator
- Adobe Photoshop
- Canva
- WordPress
- Elementor Pro
- CPanel
- UI Design
- UX Design
- Interaction Design
- User Flows
- User Research & Discovery Workshops
- Competitive Research
- Responsive Web Design
- Design Systems
- Human Interface Guidelines
- Material Design
- Atomic Design
- Interactive & AI-Assisted Prototyping
- Wireframes
- A/B Testing
- Branding
- Visual Identity
- Brand Books
- Content Creation
- Google Ads
- Meta Ads
- Community Management
- Planning
- Agile Scrum
- Prompt Design & AI Workflows
- Campaign Management
- Hosting & DNS
- Effective communication
- Client Presentations & Stakeholder Management
- Bilingual Communication (English/Spanish)
- Teamwork
- Problem solving

Important Achievements

1. Designed end-to-end experiences for 16+ web and mobile products across 6+ industries at Designli, delivering development-ready MVPs in Solution Labs and AI-prototyped concepts in 5-day Impact Weeks that shaped clients' 90-day product roadmaps.
2. Led the visual and functional redesign of more than 20 websites and landing pages for telecom and insurance brands, improving conversion rate and usability in each delivery.
3. Coordinated design and content teams, managing up to 40 active accounts simultaneously in performance campaigns (Google Ads, Meta Ads), achieving efficiency in weekly deliverables.

4. Developed end-to-end digital products for iOS, Android, and responsive web, from discovery workshops and user flows to interactive prototypes and engineering handoff, applying user-centered design (UCD), Human Interface Guidelines, Material Design, and agile methodologies (Scrum, Kanban).
5. Collaborated in multicultural and international teams, ensuring effective communication with developers, traders and marketers from different regions for the development of scalable solutions.
6. Improved professional English communication skills by working in international and customer service contexts, gaining recognition for commitment, adaptability and positive attitude.
7. Designed interfaces for SaaS products and iOS mobile apps as freelance projects, exploring modern UI patterns and visual testing with real users.
8. Helped build AI-driven design workflows at Designli, using Claude, Claude Code, Claude Design, Figma Make, Figma Agent, Antigravity, and Mobbin MCP for research synthesis, ideation, and functional no-code prototypes, and creating structured prompts that improved the consistency and speed of design deliverables and sped up idea validation with clients.

- Spanish - Native
- English - Advanced C2

Education

2025
Peruvian University of Applied Sciences (UPC)
Bachelor in Communication and Advertising

Certificates & Courses

2025
Repensar LA
Product Design Fundamentals

2025
Coursera - University of Virginia
Digital Product Management Specialization

2024
Coursera - LearnQuest
Scrum Master Certification Specialization

2024
Coursera
UX/UI Design Specialization Program

2022 / 2024
Coderhouse
UX/UI Developer

Volunteers

2025
Christian Church - Caminodevida
Voluntary participation in the area of Communications, focusing on management and updating web platforms, which has allowed me to maintain and strengthen skills in digital design and development, as well as explore new tools and emerging technologies in the sector.
