Giulio Steffano Libralato Oliva
UX/UI & Product Designer

Lima, Perú | +51 983203160 | giuliolibralatooliva@gmail.com | LinkedIn | Github

Professional Profile

UX/UI & Product Designer with 5 years of experience designing web and mobile products (iOS, Android, responsive web) for U.S. and Latin American clients in healthcare, real estate, telecom, insurance, and SaaS. Leads work from discovery workshops and user flows to interactive prototypes and Design System contributions in Figma, presenting design rationale directly to clients. Uses AI tools (Claude Code, Figma Make, Mobbin MCP) for research synthesis and rapid prototyping. Background in advertising and branding. Available immediately; open to relocation.

Work Experience

Designli.co
UX/UI Designer Semi-Senior ***September 2025 – October 2026***

- Designed end-to-end experiences for 16+ web and mobile products (iOS, Android, responsive web) across 6+ industries, including real estate, healthcare, and SaaS.
- Led design in Solution Labs, a 2-week MVP program, turning business ideas into user flows, wireframes, and interactive prototypes for development-ready MVPs.
- Helped the Design Lead build the AI-assisted Solution Lab design framework, defining tools, steps, research synthesis, and handoff to the client and Tech Lead, structured around three client design reviews: proposal scope, progress on agreed scope, and final scope.
- Conducted discovery workshops with clients and stakeholders, combined with industry and competitive research, to identify user needs and pain points and translate insights into data-informed design decisions.
- Delivered AI-prototyped new design or redesign concepts for clients' existing platforms in 5-day Impact Weeks, identifying pain points and flow bottlenecks that shaped clients' 90-day roadmaps.
- Supported Traction Labs (MVP built in 30 days, first users and customers by day 90) as an on-demand designer at 20–40 hrs/week, refining UI and flows against approved prototypes and Figma designs; iterated on active projects in Delivery.
- Built AI-assisted design workflows and structured prompts (Claude Code, Claude Design, Figma Agent, Mobbin MCP) for research synthesis, ideation, and rapid prototyping, helping reduce time to client presentation in Solution Labs.
- Contributed to and evolved the Design System, applying Human Interface Guidelines and Material Design to ensure visual consistency and efficient engineering handoff.
- Presented design proposals directly to clients, explaining the "why" behind design decisions and defining scope, in close collaboration with Product Owners, Tech Leads, engineers, QA, and Growth in Agile Scrum (English/Spanish).

High Peaks Resort
Houseman ***December 2024 – March 2025***

- Communicated in English with international teams and guests in a multicultural, service-oriented environment.

Konecta Digital Marketing Agency
UI Designer ***October 2022 – December 2024***

- Focused on telecommunications and insurance clients.
- Designed and managed visual identities, logos, and campaign visual systems for multiple brands and specific campaigns.
- Developed responsive web interfaces and landing pages on Figma and Sketch, applying user-centered design principles.
- Created visual pieces for social media, performance campaigns (Google Ads, Meta Ads) and brand launches.
- Collaborated with marketing, development and account teams on validation processes, feedback and quality control.
- Coordinated with international teams to deliver on schedule.

minegocioendigital.pe
Digital Consultant ***March 2022 – May 2022***

- Led a team of 3 people in the execution of weekly campaigns and deliverables.
- Managed a portfolio of 30–40 clients, providing tailored digital strategy consulting (branding, performance, web presence).
- Planned and executed campaigns on Google Ads and Meta Ads, optimizing performance per client.
- Designed websites in Figma, focused on usability and conversion.
- Created content and designed monthly social media calendars, customized for each industry.

minegocioendigital.pe
Product Developer ***February 2021 – July 2021***

- Designed layouts in Figma and built responsive WordPress sites from design to launch.
- Handled technical management: hosting, domains, DNS, corporate email setup, and customized client configurations.
- Wrote and designed visual content for social media, including monthly calendars and brand logos.

Personal
Freelance UX/UI Designer ***2021 – Present***

- Designed the website and design system in Figma for Lessin, an ed-tech platform (design only).
- Designed and built the Nexo Summit website (nexosummit.pe) in WordPress, from design system, wireframes, and UI design in Figma to SEO.
- Built custom WordPress plugins with Claude for Nexo Summit: WooCommerce ticket checkout with Mercado Pago, speaker management, and attendee registration at ticket purchase.
